5 Management Approach

Describe the approach to managing the project; tracking and controlling the project; assumptions, constraints, or dependencies; risk management issues; project estimates (sizing and time); staffing requirements (skills and resource load); and information on schedule and project deliverables.

5.1 Priorities

Describe the approach for determining priorities, for example, if you classify software defects by severity level (e.g. Sev 1, Sev 2, and Sev 3), then describe the procedures for resolving these issues.

5.2 Schedule

Prepare a schedule of all activities involved in the Maintenance Plan. Identify the resources required for each activity and proposed contingencies should these individuals need to be replaced.

Provide a detailed schedule (such as Work Breakdown Structure) which includes details of the start/end dates, key milestones, deliverables, and other aspects of schedule planning, for example resource management.
